Oakdene School in Bear River. Photo Taken April 2015 By Cassandra Rice

Get involved, share your stories

Anyone and everyone can be involved in this project. No computer or mapping experience is required. Bring your interest, knowledge and passion for sharing your stories and a desire to contribute to mapping our valuable communities.

About Us

"Community-created asset maps are based on the premise that local residents possess expert knowledge of their local environments which can be expressed in a geographical framework which is easily understandable and universally recognized. Participatory maps often represent a socially or culturally distinct understanding of landscape and include information that is excluded from mainstream or official maps." ~ Map Annapolis

Lighthouse found in Port George. Taken by Cassandra Rice in March 2015.

Background Information

In 2011, a group receiving funding from the Federal and Provincial Governments was created called the Age Advantage Association. In 2013 the group began a web-based community mapping project. Technical expertise and training is provided by instructors at COGS and the geomatics students.

AGENDA

Welcome and sign in

1 - 1:40pm → AV Room for Introductions and presentations

1:50 - 2:50pm→ Break Out Sessions

2:50 - 3pm → Back to AV Room for closing comments, and door prizes

---

"Put your community on the map!"

~ Cari MacKenzie,

Geographic Sciences Student
